Professional Summary

Data Analyst skilled in SQL, Python, Excel, Tableau, and Power BI, with hands-on experience cleaning data, building KPI dashboards, analyzing budget variance and productivity trends, and delivering stakeholder-ready business insights.

Skills

Programming & Querying: SQL, Python, Pandas, NumPy, R

Data Analysis: Exploratory Data Analysis, KPI Reporting, Business Performance Analysis, Trend Analysis, Variance Analysis

Data Management: Data Cleaning, Data Normalization, Data Validation, Data Integrity, Schema Validation, Data Transformation

Reporting & Visualization: Tableau, Scorecard Dashboards, KPI Dashboards, Management Reporting

Business Analytics: Budget Variance, Cost Analysis, Productivity Trends, Stakeholder Insights, Financial Reporting

Tools: Git, AWS EC2, AWS S3, PowerPoint, Excel

Education

University of Missouri-Kansas City

Master of Science in Computer Science

Aug 2024 – May 2026

GPA: 3.97

- Relevant Coursework: Data Structure, Design and Analysis of Algorithms, Data Science, Statistical Learning, Database Management Systems, Cloud Computing, Generative AI

Work Experience

Sree Nirman

Data Analyst Intern (Analytics & ML)

May 2023 – Apr 2024

Hyderabad, India

- Managed end-to-end project performance reporting for 50K+ construction cost and operations records, including data cleaning, normalization, schema validation, KPI definition, dashboard development, and stakeholder insight delivery.
- Built scorecard-style Tableau dashboards and Excel reporting views to track cost variance, labor productivity, resource utilization, budget trends, and timeline risks, improving reporting reliability by 30%.
- Conducted variance driver analysis across material, labor, and project timeline data to identify cost overruns, productivity gaps, and recurring inefficiencies, supporting operational decisions that improved efficiency by 15%.
- Developed management reporting packs and stakeholder-ready insight summaries that translated dashboard findings into clear recommendations for engineering and operations teams.
- Partnered with project stakeholders to validate metrics, standardize reporting definitions, and improve data integrity across recurring reports, helping teams monitor cost-control risks more consistently.

Avanthi High School

Data Analyst Intern

Apr 2022 – Jan 2023

Warangal, India

- Led financial analytics and reporting workflows across 12K+ student financial records and 50K+ organizational expense records covering hostel, academics, sports, and administrative operations.
- Cleaned, normalized, and validated fragmented financial datasets using Python, Excel, and Tableau, improving data accuracy by 30% and creating a reliable foundation for recurring management reporting.
- Built recurring Excel reports, KPI dashboards, and scorecard-style views to monitor department-wise expenditure, budget variance, category-level spending, and monthly financial performance.
- Performed spending trend and budget variance analysis to identify over-budget categories, spending anomalies, and resource allocation gaps, uncovering 10–15% potential cost-saving opportunities.
- Delivered monthly leadership reports and PowerPoint-style insight summaries that converted financial data into actionable recommendations, improving stakeholder visibility and reducing reporting turnaround time by 20%.

Assistantship

University of Missouri-Kansas City

Information Services Lab Assistant

Aug 2025 – May 2026

Kansas City, MO

- Support students and faculty with technical lab operations while applying structured troubleshooting, documentation, and issue-resolution practices in a university technology environment.
- Assist students with data analysis workflows, emphasizing data validation, reproducibility, structured data handling, and clear interpretation of analytical outputs.

Projects

Hospital Readmission Risk & Staffing Analytics | GitHub

Python, SQL, Statistical Analysis

- Analyzed 100K+ hospital records using Python and SQL to identify readmission risk drivers, patient follow-up patterns, and operational workload trends across specialties.
- Cleaned, transformed, and validated healthcare datasets to support risk segmentation, staffing projections, and dashboard-based reporting for capacity planning decisions.
- Built analytical dashboards with an LLM-based summary layer to translate readmission trends, risk segments, and staffing demand into clear insights for non-technical stakeholders.
